The technology behind one of the world's longest Pipe Conveyors

Long-distance conveyors are a reliable and energy-efficient methods of bulk materials transport. Pipe conveyors – fully enclosed. Double Arrow has manufactured and installed a 28 km long pipe conveyor.

Shanghai Observatory Tower

Shanghai Tower is nowadays one of the highest buildings in the world and a top attraction in China. The observation deck on the 118th floor provides outstanding views of the city and the surrounding skyscrapers like the Jinmao Tower and World Financial Center

Shanghai Tower is the newest and tallest skyscraper in China, with a height of 632 meters or 2,073 feet. The tower has some unique features, like its incredible exterior, that twists about one degree per floor to offset the wind effect on higher altitude. The Shanghai tower has two glass facades, an inner one and an outer one, like overlapping “tubes”.

The observation deck at Shanghai tower is located on the 118th floor, and allows visitors to see the neighbouring Jinmao Tower and World Financial Center from above. The elevators are also some of the fastest in the world, making the whole experience of ascending and sightseeing the city a unique adventure.

Highlights

- Visit the brand new Shanghai Tower opened in 2016
- Admire Shanghai's sunset and night-lights from 118th floor
- Obtain 360-degrees view of Shanghai from an observation deck
- Located at the floor 118th of this curve modeling structure
- Take the elevator up at 65km or 40 miles per hour
